DEMOGRAPHIC AND ECONOMIC INDICATORS

GDP in billions (current US$) 3.6
GDP per capita (current US$) 6,234
Agricultural GDP in billions (current US$) 0.3
Total population (thousands) 568
Urban population (thousands) 375
Rural population (thousands) 193

DIMENSIONS OF FSN: AVAILABILITY

The availability of sufficient quantities of food of appropriate quality, supplied through domestic production or imports (including food aid). It is related to food production, productive infrastructure, supplies and supply chains.

Evolution of employment by sector
Percentage of the total working population

Unemployment rate by gender
Percentage of labor force

Evolution of agricultural GDP in constant USD 2010

Composition (%) of caloric availability
Average percentage of the total

Agrifood balance evolution
In billions

Average growth rate (%) of agriculture value added per worker

**DIMENSIONS OF FSN: ACCESS**

Access by individuals to adequate resources (entitlements) for acquiring appropriate foods for a nutritious diet. Entitlements are defined as the set of all commodity bundles over which a person can establish command given the legal, political, economic and social arrangements of the community in which they live.

![Evolution of undernourishment](source)

**DIMENSIONS OF FSN: UTILIZATION**

Utilization of food through adequate diet, clean water, sanitation and health care to reach a state of nutritional well-being where all physiological needs are met. This brings out the importance of non-food inputs in food security.

**DIMENSIONS OF FSN: STABILITY**

To be food secure, a population, household or individual must have access to adequate food at all times. They should not risk losing access to food as a consequence of sudden shocks (e.g. an economic or climatic crisis) or cyclical events (e.g. seasonal food insecurity). The concept of stability can therefore refer to both the availability and access dimensions of food security.
